

Case – Protect your Red Pitaya STEMLab with Style

The acrylic case is the most convenient option to protect your Red Pitaya STEMLab. It protects your board against mechanical effects.

The Acrylic case is designed in a way that a fan can be mounted on top of it, thus giving additional cooling to the system.

On the left-hand side of the acrylic case there are also all the important holes for connectors.

What is in the box:

The STEMLab ALU case pack includes the Acrylic Enclosure, 8 screws and 4 rubber pads to secure the Red Pitaya positioning on the desk.
