3M™ ePrivacy Filter Software Professional Version

3M™ ePrivacy Filter is a facial recognition software which alerts you to onlookers. The software blurs the screen in instances where your security may be compromised; when you look away and when you leave your computer. Single user license

- Facial recognition feature is designed to reveal the screen for the authorized user only
- Detects over-the-shoulder eavesdroppers from behind the user, and alerts the user
- Walk away privacy blurs the screen when the user is away
- 180-degree visual privacy possible when used with a 3M Privacy Filter (privacy coverage is dependent on the webcam's field of view)
- Professional version is desgined for single users and installs directly onto your laptop
- Customizable settings to match your work style and privacy needs
- Easy to install, easy to use
- Intelligent facial recognition (continues to learn your face the more you use it)
- Low battery usage
- Pause and resume feature to turn privacy functionality on and off
- System requirements: Windows OS and webcam
